

THE Q C W A BULLETIN.

Published quarterly by the Quarter Century Wireless  
Association.  
Edited by Ralph G. Barber, W2ZM  
20 Chadwick Street,  
Glen Cove, N.Y.

VOLUME 1.

JUNE 1952.

NUMBER 1.

It is the intention of this Association to publish a quarterly bulletin. Every member should feel it is his duty to send a contribution of some sort as frequently as possible. The more news, the more readers; the more readers, the more news. Let's Go, Gang, It's your Baby.

It is also requested that all members who have news items of interest to the membership, forward same to the Editor or to the Club Secretary.

The participation in the QCWA phone net has to date been rather disappointing. It is known that there are many members who are at present on 75 meters, that have not been heard from on the net. The net at present meets on Thursday evenings at 1900 hours on a frequency of 3810 kc; and also on Sunday mornings at 1100 hours on the same frequency. Among those participating in the net, there has been quite a discussion as to a possible change of the Thursday evening net to some other evening. This is due to a conflict between it and the Old Old Timers net and MARS Activities of some of our members.

The net operation, so far, has shown a wide discrepancy in frequency and it is suggested that stations participating "Zeor-beat" the net control station. If and when the participation warrants, the net control station will be on a rotating basis.

A "CW" net has also been suggested and your Editor is open to suggestions as to time and frequencies desired.

It is with deep regret that we announce the Death of Abe Hass, W2YU, of 16 Clinton St, MountVernon, N.Y., and add his name to our list of Silent Keys.
